

## Global Check Service, Inc

The company was founded in 1994. Since that time Global Check has created and patented the ARC 90 payment plan products.

The company offers several check processing services designed to increase profitability of our merchants as well as secure sales that are commonly lost. Services are available for point of sale terminal based sales as well as internet based and over the phone acceptance of payments.

In 2011 Global Check once again pioneered a new payment method to facilitate even more sales for our merchants, the ARC D 90. Our newest program extends the availability of the ARC 90 product by offering a payment plan that does not require physical checks.

Sample purchase of  
\$1000

Various transaction combinations available  
Dollar amounts flow from left to right

Only 3 of various options
